

General Considerations

Appendix

Douglas County Kansas EMS System

November 2022

- Always monitor for scene safety
- Provide a triage to incoming ambulance
- Pt's can refuse transport at any time. If patient is found to have normal vitals, BG, mental status without any other complaints, consider cancelling ambulance response if department SOP/SOG's allow. Otherwise have the ambulance continue to obtain patient refusal.
- Give full report to arriving paramedic of all information gathered, treatments rendered and if the patient would like to be transported by ambulance.
- Assist ambulance crew
